

We Make Uniform Programs Even Easier with Company Web Stores

AmeriPride can create a company web store for your purchase apparel. Branded to match your image, your company store will offer only the products and colors you want, while using only the approved company logos. You control your brand and image. It's easy for your employees to place their orders and for businesses to manage their purchase apparel programs. Contact your AmeriPride representative for more information on how to get started.

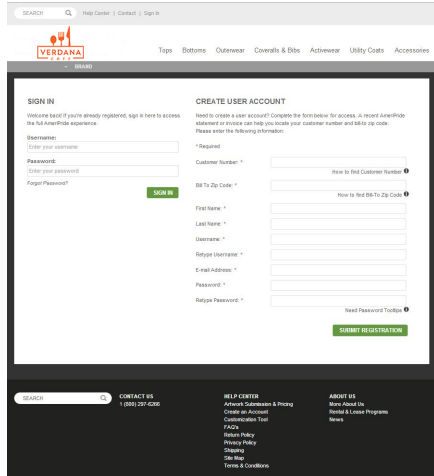

With a company web store from AmeriPride you can:

- **Empower** employees to place their own uniform orders – 24 hours a day, 7 days a week
- **Save time** processing your employee orders
- Optionally, a logo can be automatically added to items, reducing order entry time and errors
- **Limit** your product selection to provide a uniform look unique to you – choose from thousands of items
- Provide a **branded online tool** for your employee's unique uniform needs
- **Ensure brand integrity** by selecting the exact place your logo or company name needs to be
- Have orders **ship directly** to your employees home or business location – fast and accurately
- **Employees** receive automated order and shipping confirmations to keep them informed of the order status
